

Somewhere Around Here

Tim Croucher

17 Oct–15 Nov 2019

Opening event:
Wed 16 Oct, 4–7pm

As both a practicing artist and an art teacher, Tim Croucher is clear that he is constantly in a process: seeing, consuming, making, connecting and talking about art (his and others) in various ways. In this exhibition Croucher is consciously letting us into a hint of that process.

Somewhere Around Here presents a collection of new paintings and borrowed works (from his own collection and that of friends) that have piqued his interest in some way. In his own words the works are “intuitively or directly of interest or influence to me...in ways that indicate or suggest context, derivation, or even reference to tastes/preferences of mine.”

Acting as a kind of preface to the suite of new paintings, the borrowed works become pointers to some aspects of his artistic point-of-view and approach to his studio practice. We can see where the gestural or painterly derivation from the photographic is explored; the montage of the melodramatic with the every-day is celebrated and where the mythic cohabits with the familiar.

Some of the borrowed works have perhaps simple connections that will make sense to most viewers. Use of colour, the treatment of subject and painterly marks speak to Croucher’s own paintings in ways that are complementary. Some other works may seem more eclectic and left of field—but have a whimsical touch about them that is akin to Croucher’s practice.

Tim Croucher’s paintings often explore the exotic in the everyday. Lush colour palettes and gestural marks lend urban vistas a dreamy quality. This exhibition continues that line of enquiry seeing Croucher explore the curious contradictions he observes while travelling (often on his motorbike) around Kirikiriroa (Hamilton) and the Waikato region. The paintings in **Somewhere Around Here** mine the sultry beauty in the banal.

There is a playfulness in Croucher’s latest work—the quotidian subject matter rendered in dreamy colour palettes brings to mind a bogan aesthetic that can be read as cool, but also doesn’t take itself too seriously. And, the choice to hang his paintings next to other works he admires, only seeks to highlight the idiosyncratic nature of influence and taste that he, and indeed all artists contend with.

Perhaps giving us a clearer view into Croucher’s thinking and perspectives on the world than a solo show normally would, the collection presented in **Somewhere Around Here** becomes an insight into the way Croucher integrates his artistic impulses with his affection for the culture(s) he lives in.
